

Removal of placeholder texts like “New text” or “New caption”

Placeholder texts for text fields have been removed for easier editing, and the fields are initially displayed empty.

Jun 5, 2026

In new elements, the text "New text" was often already entered as an aid. This text was frequently carried over into the actual content when an editor forgot to delete it, often resulting in remnants remaining in posts.

These placeholder texts have been removed to simplify content editing and to avoid errors.
